

CaridianBCT is a leading global provider of products and services in apheresis collections, or automated collections, therapeutic apheresis and cell therapy systems, whole blood processes and pathogen reduction technologies. Serving blood centers, hospitals and researchers in more than 90 countries with its vision, *For Better Blood and Better Lives*, CaridianBCT improves lives through innovation, quality and services delivered by the company's people, products and processes.

## Facts

---

- Medical device manufacturer, founded in 1964
- Leader in the blood banking, transfusion medicine and cell therapies industries
- Provides blood technology and services to blood centers; hospitals; and biotech researchers
- Global headquarters in Lakewood, CO with regional headquarters in Brussels, Buenos Aires and Hong Kong
- Conducts operations in over 30 countries and sales in more than 90 countries with production facilities in the U.S. and Northern Ireland
- Systems include: Trima Accel® Automated Blood Collection, Spectra Optia® Apheresis, COBE® Spectra Apheresis, Atrius® Whole Blood Processing, Elutra Cell Separation, COBE® 2991 Cell Processor, OrbiSac\*, Mirasol® Pathogen Reduction Technology\*, and Quantum Cell Expansion
- Software systems include: Vista® Information System, Cadence Data Collection System, Atrius System Manager, Mirasol Manager

## Business Areas

---

**Automated Collections:** Providing blood centers with the flexibility and advanced technology needed to safely collect more of the specific components patients require, ensuring our customers have the right product, at the right time and in the right place.

**Pathogen Reduction Technologies:** Delivering groundbreaking technology that pro-actively addresses blood safety challenges through effective pathogen reduction and white blood cell inactivation.

**Whole Blood Processes:** Bringing automation and informatics to the process of manufacturing blood components from whole blood with systems that streamline the steps involved in whole blood and Buffy Coat processing—while maximizing product quality.

**Therapeutic Apheresis and Cell Therapy Systems:** Delivering and supporting a range of technologies, enabling advances in medicine through innovations in therapeutic apheresis, cell collections, cell and tissue processing, and cell expansion.
